Chailicious®

Chailicious®, our registered brand name for Tea products and Tea masalas. Chailicious® was derived from Delicious Chai born from a desire to share our love for chai. We also have Chailicious Vehicle: Tea on wheels and Chailicious Outlets.

Tea has become a very common over-the-counter specialty beverage and there is a growing line of pre-packaged Chai products & Instant premixes. Our aim is to **provide one-stop shopping for variety of best Tea flavors for Tea Lovers through various channels.**

Navastri®

Navastri®, is an initiative to cater to the rural women by providing a branded range of food and home products that suit the culture and heritage of rural communities.

With our brand, Navastri®, iFuture Globistic is working towards providing quality products at affordable prices as we understand that rural women are more value-centric and demand value for money and not cheap products. We want rural women to connect with our brand: Navastri® for its products trustworthiness and reliability.

Navastri® products are tailor-made with deep understanding of rural women consumers and products will be available at a price that stands out from alternatives in the market.

Navastri® as a project is aiming to partner with local women social network centers in rural villages of India to empower women and influence economic growth as women are decision makers when it comes to purchasing products for home.

Our Infrastructure

We have established a sophisticated infrastructure in Visakhapatnam, Andhra Pradesh. Our infrastructure is divided into various departments comprising of Processing area, Grading area, Packing area, Blending area and Container Loading area. This helps us carry out all our business related activities in a proper manner. Our departments are well-equipped with various machines that help in manufacturing the products in bulk quantities. We regularly update our machines to maintain the excellent rate of production.

We use best in class Pulverizers to get a perfect grind. We have interlinked the Pulverizers to get a hands free process, also further attaching a Sieving machine to get a uniform grind. We go through a grading process and metal scanning process, before goods are fed to the feeder. After we process the products we pack them using our in-house Packing Machines that enable us to pack products with high speed and hygiene. It is vital for the products to be packed in their Final Packaging after its ground or blended to retain the aroma, taste, colour and shelf life. We have **collaborated with several laboratories to run various tests on our finished products** before shipment.

The pulverizers have chilled air passing through the spices at 5°C to reduce product temperature while grinding by 25°C– 35°C, which will retain the aroma, taste, colour and shelf life. ruca offers a wide variety of packing options for our clients.
