iFuture Globistic Limited

# ABOUT COMPANY

# WHO ?

iFuture Globistic Limited is a technology company that was established in 2018 and is based in Visakhapatnam. iFuture Globistic is primarily into technology with a vision to develop innovative products and provide IT services. We specialize in Software & Hardware development, Machine Learning, Artificial Intelligence, Cloud Computing and Internet of Things (IoT) services. We provide advanced machine learning services & solutions and also provide custom software consulting and development solutions catering to variegated needs of the industries.

iFuture Globistic was established to provide information technology solutions for small to medium-sized businesses. Our mission from the very first day has been to cultivate professional relationships with our clients **to provide effective and reliable information technology solutions for their needs.** The team at iFuture Globistic is equipped with a skillset developed over decades of experience not only in information technology but also in business processes across a range of industry sectors.

At iFuture Globistic, since our inception, our primary objective has been to develop robust, custom solutions that help our **clients operate more efficiently.** iFuture Globistic was established to deliver leading edge ubiquitous secure technologies, intelligent technical solutions and services to businesses, organizations and governmental bodies, with robust, extensible and enhanced solutions for information sharing, data exchange, services invocation and communication.

iFuture Globistic invests in building connections between technologies and partners, enabling them to collaborate, co-innovate and expand their reach with an ecosystem of partners, helping them drive higher **efficiency and automation and becoming more agile in the face of competition.** We use our expertise and experience to create solutions that have real impact on the present and future. Our team of developers and designers approach each project analytically and work towards giving our clients the best quality products and services. **At iFuture Globistic, we offer affordable vehicle tracking solutions for tracking vehicles, people and assets. We provide effective tracking solutions for any industry. We also provide device to improve efficiency of emergency response time.**

## OUR VISION

---

To develop innovative products while building Careers of Tomorrow at the same time.

## OUR MISSION

---

Our Mission is to serve our customers and consumers worldwide as the most trusted partner. We strive to be a leading company worldwide by providing innovative, great quality and impeccable services.

# Suma Cloud™

---

Cloud computing is the on-demand delivery of IT resources over the Internet with pay-as-you-go pricing. However, this has certain challenges. Suma Cloud™ is a private cloud platform developed to overcome these challenges and make it easier for companies to leverage machine learning capabilities to solve business problems without the full tech burden.

**Suma Cloud™ offers cloud infrastructure to mid and small sized industries for setting up in-house private clouds and carryout big data processing using the private cloud infrastructure.**

Suma Cloud™ will help in building machine learning models using the big data and deploying the models in the cloud. Suma Cloud™ can be easily deployed and customized over 10s of servers in a private cloud environment and it is easy to add more servers to the private cloud environment using Suma Cloud™.

Suma Cloud™ is a solution for the accessibility challenges of everyday developers and scientists working towards enabling AI and Machine learning in the enterprises.

**Quicxly™**

---

Quicxly™ is comprehensive cloud human capital management (HCM) software for managing the entire employee lifecycle. Quicxly™ provides a platform that combines HR, payroll, benefits, workforce management and talent management in a single application. Our platform helps you manage the entire employee lifecycle, from recruiting and on boarding, to paying people and developing their careers.

**Human Resources (HR)**

No more searching around for employee information. Get a single, complete record for all employees that automate tasks, making HR easier and more productive.

**Payroll**

Continuously calculate net pay, so you can spend less time on payroll processing and more time on achieving your goals.

**Talent Management**

Attract, engage, develop, and motivate your workforce with Quicxly™.

**Workforce Management**

Manage your workforce, increase operational efficiency and help improve compliance with complex rules.

Quicxly™ provides solutions for organisations of all sizes, from small businesses to global organisations.

## Key Highlights

### One Application

01

With data stored in a single, central location, get data-driven insights across all HR functions so you can make better decisions for the entire employee lifecycle. Quicxly™ simplifies workflows, increases accuracy, and enhances compliance.

### Actionable Insight

02

Get the right data to the right people at the right time. Quicxly™ provides critical data-driven insights to help you make fast, informed decisions. Sophisticated predictive technologies help align business strategy with daily operations.

### Anytime, Anywhere access

03

Quicxly™ is designed with Mobility in Mind. Quicxly™ can be accessed using the device of your choice on web or mobile. It gives employees control of their data with anytime access, and helps organizations make sure their employee information is accurate and up to date.

### Cloud Ready

04

Quicxly™ delivers innovation with its services-oriented architecture on a highly performant cloud platform that is private or public cloud ready to enable a seamless upgrade process and make work easy for our customers.

# Trackia™

Trackia™ is our plug & play tracking device with minimum installation. We have three versions that have features like real time tracking, speed alerts, geo-fencing alerts, route planning, fuel monitoring, collision detection, theft alerts, no parking alerts, emergency call support and many more features.

With Trackia™ you can ensure safety of your loved ones, identify vehicle misuse by your driver, track your car from the web and smartphone and protect your vehicles from theft.

- Trackia™ can determine the precise location of a vehicle, person or the asset.
- It continuously transmits data to the centralized database using cellular radio.
- Real time tracking can be done via both android and web application.
- Route planning.
- Speed limit alerts.
- Geo fence alerts - alerts if the vehicle reached its the destination.
- Easily accessible history records.

## Trackia™ Versions

**1.0** Trackia™ 1.0: It is the basic plug & play tracking device with minimum installation.

**2.0** Trackia™ 2.0: It is equipped with advanced fuel monitoring and accident collision technology.

**3.0** Trackia™ 3.0: It is IP67 water resistant.

# Grab Auto Parts™

---

Grab Auto Parts™ is another project through which we plan to provide support services to customers by locating the requested car parts from various Salvage yards, Junkyards and Auto part recycler & resellers. Grab Auto Parts is an online auto parts locating service. Our service is set up to take all the legwork out of the customer having to call around from Junkyard to Junkyard, various Garages looking for auto parts for their vehicle.

We act as auto parts locator on behalf of customer to make the process easy for the customer to buy auto parts from our network of yards nationwide.

# Emergent

Emergent is a sophisticated high-end technology that makes emergency services more efficient and effective. Our device is designed to improve efficiency of emergency response time. Emergency vehicles, such as Ambulances, are generally permitted to cross an intersection against a traffic signal. However, a lot of ambulances get stuck at traffic signals due to heavy traffic. During critical conditions there are chances that the patients lose life due to delay in hospitalization.

Being struck in Traffic in critical emergency situation can cost patients their life. So, it is highly essential to pre-empt traffic in their way of passage for emergency vehicles and thereby eliminate the inconvenience.

With **Emergent** you can provide better and faster emergency response, help save more lives and in turn decrease in mortality rate.

- Emergent is an IoT device designed to save lives by enabling smart grid system.
- Emergent improves efficiency of response time of emergency services.
- Our device is equipped with Artificial Intelligence which will optimize the route of the ambulance to improve the response time.
- Real time trac With Emergent, when an emergency vehicle unit enters into the geographical location of traffic unit, the traffic device is triggered by the cloud that receives the severity of emergency.
- The traffic unit identifies the location of the vehicle, direction of travel and based on the severity of the emergency, controls the traffic signal to clear the path for the vehicle.
- Also, Hospital can monitor the condition of the patient, track the location of the ambulance through the database.

We're also working on integrating **Trackia™** & **Emergent** with Artificial Intelligence.

# OUR SERVICES

—

At iFuture Globistic, we also provide advanced Internet of Things (IoT) & Cloud services and solutions. Our developers utilize machine learning, neural networks and artificial intelligence to help businesses in this digital era. We provide flexible engagement models to meet diverse business needs.

### **Cloud Deployment Services**

We offer various cloud deployment services imparting custom build solutions that help transform enterprises move to the Cloud.

### **Call Center Solutions**

Expand your customer reach with Contact Center Solutions. We provide call centre solutions for a seamless customer experience with minimal investment to streamline complex business communication with our robust Call Center Software, QuicklyDial.

### **Web Development**

We use latest web technology coupled with artistic design elements that will place your business in good light.

### **Internet of Things (IoT)**

Our (IoT) core team provides end-to-end internet-of-things services for all kinds of industry applications.

### **App Development**

Based on our customer requirement, we build stand-alone, client-server, data-driven or web-service driven mobile apps that are versatile, user-oriented and visually appealing for all platforms.

### **Web Hosting**

We offer custom built, easy to use, fast and reliable web hosting services, both shared and dedicated hosting.

**We're more than a Technology provider. We offer a range of services to support your business. Get in touch with us to learn how we can help you succeed.**
